## 1.0 Introduction

### *1.1 Purpose*

The purpose of this document is to provide a description of the methodology used to create the “SIG National Assessment Results Summary: Cohorts 1 and 2.” The results are based on SY 2009-10, 2010-11, and 2011-12 proficiency data on Cohort 1 and 2 SIG schools.

### *1.2 School Improvement Grants Program Background*

School Improvement Grants (SIG), authorized under section 1003(g) of Title I of the Elementary and Secondary Education Act of 1965, are grants to State educational agencies (SEAs) to support competitive sub-grants to local educational agencies (LEAs) that demonstrate the greatest need and strongest commitment to use the funds to substantially raise the achievement of students in their lowest-performing schools. In general, SEAs must give priority to LEAs with Title I-eligible schools ranked in the bottom five percent of such schools, based on student achievement and lack of progress in improving student achievement, as well as secondary schools with a graduation rate below 60 percent over a number of years. LEAs seeking funding to serve such schools must implement one of four school intervention models: turnaround model, transformation model, restart model, or school closure.

A **turnaround model** is one in which an LEA must do the following:

- (1) Replace the principal and grant the principal sufficient operational flexibility (including in staffing, calendars/time, and budgeting) to implement fully a comprehensive approach in order to substantially improve student achievement outcomes and increase high school graduation rates;
- (2) Use locally adopted competencies to measure the effectiveness of staff who can work within the turnaround environment to meet the needs of students,
  - a) Screen all existing staff and rehire no more than 50 percent; and
  - b) Select new staff;
- (3) Implement such strategies as financial incentives, increased opportunities for promotion and career growth, and more flexible work conditions that are designed to recruit, place, and retain staff with the skills necessary to meet the needs of the students in the turnaround school;
- (4) Provide staff ongoing, high-quality, job-embedded professional development that is aligned with the school’s comprehensive instructional program and designed with school staff to ensure that they are equipped to facilitate effective teaching and learning and have the capacity to successfully implement school reform strategies;

## Documentation of Methodology – SIG National Assessment Results Summary

- (5) Adopt a new governance structure, which may include, but is not limited to, requiring the school to report to a new “turnaround office” in the LEA or SEA, hire a “turnaround leader” who reports directly to the Superintendent or Chief Academic Officer, or enter into a multi-year contract with the LEA or SEA to obtain added flexibility in exchange for greater accountability;
- (6) Use data to identify and implement an instructional program that is research-based and vertically aligned from one grade to the next as well as aligned with State academic standards;
- (7) Promote the continuous use of student data (such as from formative, interim, and summative assessments) to inform and differentiate instruction in order to meet the academic needs of individual students;
- (8) Establish schedules and implement strategies that provide increased learning time; and
- (9) Provide appropriate social-emotional and community-oriented services and supports for students.

A **transformation model** is one in which an LEA must do the following:

- (1) Replace the principal who led the school prior to commencement of the transformation model;
- (2) Use rigorous, transparent, and equitable evaluation systems for teachers and principals that —
  - a) Take into account data on student growth as a significant factor as well as other factors, such as multiple observation-based assessments of performance and ongoing collections of professional practice reflective of student achievement and increased high school graduation rates; and
  - b) Are designed and developed with teacher and principal involvement;
- (3) Identify and reward school leaders, teachers, and other staff who, in implementing this model, have increased student achievement and high school graduation rates and identify and remove those who, after ample opportunities have been provided for them to improve their professional practice, have not done so;
- (4) Provide staff ongoing, high-quality, job-embedded professional development that is aligned with the school’s comprehensive instructional program and designed with school staff to ensure they are equipped to facilitate effective teaching and learning and have the capacity to successfully implement school reform strategies; and

## **Documentation of Methodology – SIG National Assessment Results Summary**

- (5) Implement such strategies as financial incentives, increased opportunities for promotion and career growth, and more flexible work conditions that are designed to recruit, place, and retain staff with the skills necessary to meet the needs of the students in a transformation model.
- (6) Use data to identify and implement an instructional program that is research-based and vertically aligned from one grade to the next as well as aligned with State academic standards;
- (7) Promote the continuous use of student data (such as from formative, interim, and summative assessments) to inform and differentiate instruction in order to meet the academic needs of individual students;
- (8) Establish schedules and implement strategies that provide increased learning time; and
- (9) Provide ongoing mechanisms for family and community engagement.

A **restart model** is one in which an LEA converts a school or closes and reopens a school under a charter school operator, a charter management organization (CMO), or an education management organization (EMO) that has been selected through a rigorous review process. A restart model must enroll, within the grades it serves, any former student who wishes to attend the school.

A **school closure model** occurs when an LEA closes a school and enrolls the students who attended that school in other schools in the LEA that are higher achieving. These other schools should be within reasonable proximity to the closed school and may include, but are not limited to, charter schools or new schools for which achievement data are not yet available.

Schools eligible to receive funding through SIG are categorized into the following three tiers:

### **Tier I Schools**

Any Title I school in improvement, corrective action, or restructuring that -

- a) Is among the lowest-achieving five percent of Title I schools in improvement, corrective action, or restructuring in the State, or the lowest-achieving five Title I schools in improvement, corrective action, or restructuring in the State, whichever number of schools is greater; or
- b) Is a high school that has had a graduation rate, as defined in 34 CFR section 200.19(b) that is less than 60 percent over a number of years.

At its option, an SEA may also identify as a Tier I school an elementary school that is eligible for Title I, Part A funds that -

- a) 1) Has not made adequate yearly progress for at least two consecutive years; or

## **Documentation of Methodology – SIG National Assessment Results Summary**

2) Is in the State’s lowest quintile of performance based on proficiency rates on the State’s assessments under Section 1111(b)(3) of the ESEA in reading/language arts and mathematics combined; and

- b) Is no higher achieving than the highest-achieving school identified by the SEA under paragraph (a)(1)(i) of the definition of “persistently lowest-achieving schools” in Section I.A.3 of SIG final requirements.

### **Tier II Schools**

Any secondary school that is eligible for, but does not receive, Title I funds that -

- a) Is among the lowest-achieving five percent of secondary schools or the lowest-achieving five secondary schools in the State that are eligible for, but do not receive, Title I funds, whichever number of schools is greater; or
- b) Is a high school that has had a graduation rate as defined in 34 CFR section 200.19(b) that is less than 60 percent over a number of years.

At its option, an SEA may also identify as a Tier II school a secondary school that is eligible for Title I, Part A funds that —

- a) 1) Has not made adequate yearly progress for at least two consecutive years; or
- 2) Is in the State’s lowest quintile of performance based on proficiency rates on the State’s assessments under section 1111(b)(3) of the ESEA in reading/language arts and mathematics combined; and
- b) 1) Is no higher achieving than the highest-achieving school identified by the SEA under paragraph (a)(2)(i) of the definition of “persistently lowest-achieving schools in Section I.A.3 of SIG final requirements;” or
- 2) Is a high school that has had a graduation rate as defined in 34 CFR 200.19(b) that is less than 60 percent over a number of years.

### **Tier III Schools**

Any Title I school in improvement, corrective action, or restructuring that is not a Tier I school or Tier II school.

At its option, an SEA may also identify as a Tier III school a school that is eligible for Title I, Part A funds that -

- a) 1) Has not made adequate yearly progress for a least two years; or
- 2) Is in the State’s lowest quintile of performance based on proficiency rates on the State’s assessments under section 1111(b)(3) of the ESEA in reading/language arts and mathematics combined; and
- b) Does not meet the requirements to be a Tier I or Tier II school

## Documentation of Methodology – SIG National Assessment Results Summary

Tier III schools are not required to implement a SIG intervention model and are not represented in the National Assessment Results.

The national summary presents data on Cohort 1 and 2 SIG schools only. Cohort 1 SIG schools are Tier I and II schools that received SIG funds to begin implementation of a SIG intervention model in the 2010-11 school year. Cohort 2 SIG schools are Tier I and II schools that received SIG funds to begin implementation of a SIG intervention model in the 2011-12 school year. SIG is also currently funding a Cohort 3 and 4, which began implementation in the 2012-13 school year and 2013-14 school year, respectively.

## 2.0 SIG National Assessment Results Summary

### 2.1 Data

The following *EDFacts* data files were used to prepare the SIG National Assessment Results Summary:

File Name	Data Group(s)	School Year(s)
N075 Academic Achievement in Mathematics	DG583	SY2009-10 & SY2010-11
N175 Academic Achievement in Mathematics	DG583	SY2011-12
N078 Academic Achievement in Reading (Language Arts)	DG584	SY2009-10 & SY2010-11
N178 Academic Achievement in Reading (Language Arts)	DG584	SY2011-12

Public versions of the assessment data files above can be downloaded from <https://explore.data.gov/>. For more information on the use of these files for analysis, please refer to each file's accompanying data documentation.

Cohort 1 and 2 SIG schools were identified for these analyses by the Department of Education's Office of School Turnaround (OST). Updated lists of tier I and II SIG awarded schools in Cohorts 1, 2, 3, and 4 are available on the OST website (<http://www2.ed.gov/programs/sif/index.html>).

In addition to *EDFacts* and OST data, these analyses utilized the following data from the National Center for Education Statistics' Common Core of Data (CCD) Public Elementary/Secondary School Universe Survey: School Years 2009-10, 2010-11, and 2011-12. CCD data files and documentation are available for download at <http://nces.ed.gov/ccd/pubschuniv.asp>. The 2009-10 CCD variable names differ slightly from the 2010-11 and 2011-12 CCD variable names because of a "09" suffix for each variable name:

## Documentation of Methodology – SIG National Assessment Results Summary

- ULOCAL: NCES urban-centric locale code
- LEVEL: School level (of instruction)
- STATUS: School Status (to determine whether a school was open/operational)
- G03: Total grade 3 students
- G04: Total grade 4 students
- G05: Total grade 5 students
- G06: Total grade 6 students
- G07: Total grade 7 students
- G08: Total grade 8 students
- G09: Total grade 9 students
- G10: Total grade 10 students
- G11: Total grade 11 students
- G12: Total grade 12 students

Values reported in the CCD for ULOCAL were recoded to create “locality” distinctions on slides 14 through 17 of the National Assessment Results Summary.

### Reported CCD values and definitions for ULOCAL:

- 11 = City, Large: Territory inside an urbanized area and inside a principal city with population of 250,000 or more.
- 12 = City, Mid-size: Territory inside an urbanized area and inside a principal city with a population less than 250,000 and greater than or equal to 100,000.
- 13 = City, Small: Territory inside an urbanized area and inside a principal city with a population less than 100,000.
- 21 = Suburb, Large: Territory outside a principal city and inside an urbanized area with population of 250,000 or more.
- 22 = Suburb, Mid-size: Territory outside a principal city and inside an urbanized area with a population less than 250,000 and greater than or equal to 100,000.
- 23 = Suburb, Small: Territory outside a principal city and inside an urbanized area with a population less than 100,000.
- 31 = Town, Fringe: Territory inside an urban cluster that is less than or equal to 10 miles from an urbanized area.
- 32 = Town, Distant: Territory inside an urban cluster that is more than 10 miles and less than or equal to 35 miles from an urbanized area.
- 33 = Town, Remote: Territory inside an urban cluster that is more than 35 miles from an urbanized area.
- 41 = Rural, Fringe: Census-defined rural territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2.5 miles from an urban cluster.
- 42 = Rural, Distant: Census-defined rural territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, as well as rural territory that is more than 2.5 miles but less than or equal to 10 miles from an urban cluster.
- 43 = Rural, Remote: Census-defined rural territory that is more than 25 miles from an urbanized area and is also more than 10 miles from an urban cluster.

## Documentation of Methodology – SIG National Assessment Results Summary

<b>ULOCAL permitted values</b>	<b>Locality permitted values</b>
11, 12, and 13	City
21, 22, and 23	Suburb
31, 32, and 33	Town
41, 42, and 43	Rural

Values reported in the CCD for LEVEL were used for the analysis by school level on slides 10-13. For the purposes of the summary, “Primary” schools are referred to as “Elementary” schools and “Other” schools are referred to as “Combined” schools:

- 1 = Primary (low grade: PK through 03; high grade: PK through 08)
- 2 = Middle (low grade: 04 through 07; high grade: 04 through 09)
- 3 = High (low grade: 07 through 12; high grade: 12 only)
- 4 = Other (any other configuration not falling within the above three categories, including ungraded and operational schools with nonapplicable grade spans)

### ***2.2 Methodology***

The purpose of the national summary is to provide the public with an overview of SIG Cohort 1 and 2 awarded schools’ assessment results. Each data element is disaggregated by SIG model, school level, and locality, when applicable. The national summary includes:

- Number of SIG schools included in the analysis, disaggregated by SIG model, school level, and locale
- SY2009-10, SY2010-11, and SY2011-12 assessment analysis of SIG schools and all schools nationally

#### ***2.2.1 Data File Construction***

The accompanying SIG analyses are based on a single data file that matches OST’s Cohort 1 and 2 SIG awarded schools list with three years of data from the *EDFacts* and CCD data files listed in section 2.1 above. The files were merged based on the unique NCESSCH identifier.

Across years, the NCESSCH identifier changed for a small number of SIG awarded schools on the SIG awarded schools list. For these schools, the files were merged using NCESSCH identifiers from multiple years so that their achievement data could be linked over time. On the final data file, SIG schools with changing NCESSCH identifiers were included in multiple records so that no data would be lost, and these SIG schools were flagged as duplicates. In the SIG assessment analyses, the duplicate records were removed so no schools were double counted.

## Documentation of Methodology – SIG National Assessment Results Summary

Schools that were not included in OST’s SIG awarded schools list and whose NCESSCH identifiers changed over time could not be identified in the same way that schools on the SIG awarded schools list were. Schools in the all schools category were excluded from these analyses if their NCESSCH identifiers could not be matched over time, because a change in proficiency rates could not be calculated. All schools on the final data file are associated with a NCESSCH identifier from the 2011-12 CCD file.

The final analytic file was created through a series of merges, beginning with within-year file merges and then merging these files across years. The first merge combined the CCD and *EDFacts* assessment files by year (for 2009-10, 2010-11, and 2011-12). A year-specific suffix (e.g. “\_0910” for the year 2009-10) was added to variables from CCD and *EDFacts* data files to distinguish them across years after the merge. A multi-year SIG school file was created by merging each year of CCD/ *EDFacts* with the Cohort I and II SIG awarded schools list into one file, first merging 2009-10 and 2010-11 data, and then merging the combined 2009-10 and 2010-11 data with the 2011-12 data.

Cases on these files that were not associated with any schools on the SIG awarded school list were merged into a separate, multi-year non-SIG school file. The final data file was created by appending the multi-year non-SIG school file to the multi-year SIG school file. This final file included schools that were excluded from the analyses of proficiency rates. For more detail on excluded schools, see section 2.2.2 below.

### ***2.2.2 Summary of Assessment Results in SIG Schools and All Schools***

In order to increase the comparability of the assessment change results across years, some schools were excluded from the SIG and “All Schools” average proficiency rates if:

- The school was missing assessment data for all years under examination (Schools were flagged for exclusion for missing academic achievement data by year if the associated *EDFacts* record had missing data for all achievement variables; otherwise the exclusion flag was assigned a value of missing. For each analysis, the school was excluded if any year in the analysis had the exclusion flag. Additionally, any school that had missing data for the overall proficiency percentage in either reading or math, for either year in the analyses was excluded because a change score could not be calculated. While these schools were not flagged for this missing data exclusion, they were excluded from the associated analyses and are listed under the “No Data” exclusion column in Appendices A and B.);
- The school implemented the closure model in either SY2010-11 or SY2011-12 or the school no longer participated in the SIG program in SY2011-12;
- The school is known to have split into multiple schools or merged with another school between SY2009-10 and SY2011-12. This exclusion was only applied to SIG schools and not to schools in the “All Schools” categories;

## Documentation of Methodology – SIG National Assessment Results Summary

- The school did not offer any tested grades in the analysis years. Schools were flagged for exclusion if the grade enrollment data on the CCD data file for all tested grades (Grades 3-12) was missing;
- The school was not open in SY2011-12 (based on 2011-12 CCD data);
- The school added or lost more than one grade level of instruction (unless changes only affected grade levels below grade 3). A “grade change” variable was created for each of grades 3-12. The variable assigned a value of 1 to schools with a CCD in-grade enrollment count of greater than one in one year, but a value of zero or missing in the other year. “Grade change” variables were calculated from CCD data between 2009-10 and 2011-12, and between 2010-11 and 2011-12, for the associated analyses. Schools were flagged for exclusion (value of 1) if the school had a value of 1 for two or more of the “grade change” variables for the associated analyses. Schools that had a value of 1 for one or fewer of the grade change variables were not flagged for this exclusion;
- There were concerns about the *EDFacts* data quality based on state data reporting issues (data quality concerns affected Colorado and Bureau of Indian Education schools in all years, and for South Carolina schools’ SY2009-10 data);
- The state significantly changed the assessment used for reporting in N075, N175, N078, and/or N178 between SY2009-10 and SY2010-11, or between SY2010-11 and SY2011-12. These exclusions were specific to schools in the year span, subject (reading or math), and the grade span (either grades 3-8 or grades 9-12) affected by the changes. For example, if a state’s only assessment change was in high school reading between SY2009-10 and SY2010-11, those schools would still be included in all analyses of math assessment data, and for analyses of reading assessment for grades 3-8 between SY2009-10 and SY2011-12, and for all assessments between SY2010-11 and SY2011-12. These exclusion rules resulted in eight separate exclusion flags for states with:
  - Math assessment change for grade 3-8, SY2009-10 to SY2010-11
  - Math assessment change for grade 3-8, SY2010-11 to SY2011-12
  - Reading assessment change for grade 3-8, SY2009-10 to SY2010-11
  - Reading assessment change for grade 3-8, SY2010-11 to SY2011-12
  - Math assessment change for high school, SY2009-10 to SY2010-11
  - Math assessment change for high school, SY2010-11 to SY2011-12
  - Reading assessment change for high school, SY2009-10 to SY2010-11
  - Reading assessment change for high school, SY2010-11 to SY2011-12Schools with any of the above exclusion flags are noted under a single “Assessment Change” column in Appendices A and B;

Once each exclusion flag had been applied to the relevant analysis, the average percent proficient was weighted by the number of valid test-takers within each subject and year to calculate the final results displayed in the national summary.

## **Documentation of Methodology – SIG National Assessment Results Summary**

The “10 percentage point or more”, “1-9 percentage point” gains and declines, and “No change” in proficiency rates categories used in slide 3 were created by subtracting rounded math and reading proficiency rates in the pre-funding year from the same rounded rate in SY2011-2012. All rates were rounded to the nearest whole integer before calculating the difference. Schools with equal rounded proficiency rates in both years were labeled as “No change”. Schools whose SY2011-12 rounded proficiency rate was 10 or more percentage points higher than in the pre-funding year were classified as “10 percentage point or more gains”, those with a difference between 1 and 9 points were classified as “1-9 percentage point gains” and categories for losses were similarly calculated for schools where SY 2011-12 proficiency rates were lower than in the pre-funding year. All percentages presented in slide 3 are not weighted.

Previous SIG Summaries included an additional “fall testing” exclusion. This “fall testing” exclusion removed schools in states that allowed assessments to be administered in the fall, because fall assessments would coincide with the beginning of SIG implementation. Sensitivity analyses on the proficiency gains and losses between SY2009-10 and SY2011-12 that included and excluded schools in “fall testing” states revealed nominal differences. As a result, schools in these states are included in the SY2009-10 and SY2011-12 analyses.

For a list of the schools with exclusion flags for the assessment analyses, see Appendices A and B.

## 3.0 Guidance for Interpreting the National Summary

### 3.1 Frequently Asked Questions

#### **Should these summaries be used to draw conclusions about the effectiveness of the SIG program or of specific SIG Models?**

Though assessment summaries are provided for years before and after SIG implementation, these summaries should NOT be used to draw firm conclusions about the SIG program. Schools' assessment rates can rise and fall over one or more years for a variety of reasons, and any changes (positive or negative) cannot be wholly attributed to SIG. Additionally, the selection of different SIG models may be correlated with other factors that affect proficiency rates that are not attributable to the model alone. The Institute of Education Sciences (IES) is currently conducting a rigorous evaluation of the SIG program which will provide a quasi-experimental analysis of SIG effectiveness.

#### **Are state assessments the same?**

No. State assessments are designed by each state to measure the content the state has determined to be appropriate for that grade and subject. As a result, both the content on the tests and achievement standards students must meet to be considered “proficient” vary across states. Therefore, specific proficiency rates for schools in different states are not the same. The average proficiency rates in the national assessment summary represent the percentage of SIG students meeting their state’s proficiency bar in each year. Note that the averages are affected by the number of SIG schools in states with relatively high or relatively low proficiency standards. For more information, the National Center for Education Statistics (NCES) has released a series of studies exploring state assessment comparability utilizing the National Assessment of Educational Progress (NAEP).

NCES studies on NAEP and state assessments can be accessed online here:

<http://nces.ed.gov/nationsreportcard/studies/statemapping/>

#### **How were SEA assessment change exclusions identified?**

ED used SEA survey responses, communication with SEAs, and additional research to determine whether an SEA’s assessment results were comparable from one year to the next. The final exclusions reflect decision rules defined by ED prior to the start of these analyses. Although ED conducts extensive research on assessment changes for SIG summaries and profiles, the assessment change exclusions for the schools in Appendices A and B is not exhaustive and is open to interpretation under different analyses.

If you have a suggested change to any exclusion rule for future analyses, please send an e-mail to [OESE.OST@ed.gov](mailto:OESE.OST@ed.gov). To assist us in responding to the concern, please format your e-mail as follows:

The subject line of the e-mail should be:

## **Documentation of Methodology – SIG National Assessment Results Summary**

### **SIG National Summaries**

In the body of the email please provide a description of the issue and proposed change.

#### **Should these results align with data reported on State websites and report cards?**

Not necessarily. States may update their websites on different schedules than they use to report to ED. States may also build their websites and online report cards to utilize only the results for students who were present for the full academic year, and therefore were included within school and district accountability determinations. The data in the assessment files used in these analyses includes information on all students who received a valid score on the state assessment, regardless of their “full academic year status”. Additionally, ED uses a method to protect the privacy of individuals represented within the data that could be different than the method used by an individual state.

#### **Should these results align with other data published by ED?**

Not necessarily. State-level data are finalized in each State’s Consolidated State Performance Report (CSPR), and also published on ED Data Express and in the ESEA Report to Congress. Data published in these locations are point-in-time data, and they reflect the official data for a particular school year. If states resubmit school or district level data after they finalize their CSPR, then school and/or district level data may not align with the data used in these analyses. Additionally, schools were excluded from the assessment summary for a variety of reasons (see Section 2.2.2).
